

Our Story.

Premium Quality Bee Products.

BeeHealthy
Australia

Company Introduction & industry

Formed in 2010 by its founder and creative director Michael Philippou, Bee Healthy Australia has grown from a small home based business, to Australia's largest distributor and manufacturer of bee derived raw materials and retail ready products.

Our Capabilities

We've got the bee industry covered, from bee hives to harvesting to freeze drying.

We have over 2000 bee hives in our local South Australian Apiary Network.

A beekeeper wearing a white protective suit and a mesh veil is shown in profile, holding a wooden frame covered in bees. The scene is outdoors, with a blue metal smoker and other equipment visible in the foreground. The background shows a blurred landscape with trees and hills under a soft, hazy sky. The overall tone is warm and professional.

Processing & Production

With our brand new facility built in Adelaide we are the first company in Australia to handle and process raw materials derived from the bee hive.

Research & Development

With our purpose-built laboratory and research centre, we now have quality control at our fingertips. The first of its kind HPLC Lab specifically designed for the assessment of quality and active ingredients found in royal jelly, bee propolis and bee pollen. Bee Healthy Australia has set a new benchmark for Australian standards

we hope to help the emerging Australian industry reach its full potential, whilst ensuring only premium high potency raw materials, free from chemicals and pesticides exist in the Australian and export market.

Our Company Statement

To go above and beyond the expectations of our clients.

To be ethical and transparent about everything we create.

To always put your health before profit.

Fresh Royal Jelly

Royal Jelly is the food of queens. Produced in very small quantities in each hive, worker bees feed this highly nutritious substance to the young, only for a while, and to their sole queen for the rest of her life. Royal Jelly is rich in proteins, lipids, vitamins, minerals and enzymes, so it's no wonder that the Queen Bee grows larger and lives longer than any others in the colony.

100% natural, No artificial colors, flavors, preservatives or additives. Just pure royal jelly.

Freeze Dried Royal Jelly Powder

Bee Healthy Australia is excited to be delivering globally the highest quality Royal Jelly powder Australia can produce. We have completed the first successful freeze drying on a commercial scale on our shores

Advantages: Higher active ingredient, 3.5kg fresh royal make 1kg of Powder, Does not require refrigeration

Propolis

We have a good supply of Propolis emerging from South Australia, especially from our clean, disease-free Kangaroo Island. We supply the following:

- Crude Propolis
- Pure Propolis resin
- Propolis Powder
