BEE HEALTHY AUSTRALIA

Our Story

Founded in 2010 by our Innovation Developer, Michael Philippou MD, Bee Healthy Australia has grown to become world-renowned for the highest quality royal jelly, bee propolis and bee pollen.

Both intrigued and inspired by the incredible health benefits of apiary-derived raw materials, Michael was driven to unlock the science behind them, and share these benefits with the world.

From our humble, home-based business beginnings, Bee Healthy Australia now operates out of a state-of-the-art, purpose-built research laboratory and production facility.

That’s the investment required to become a world authority in apiculture development, and deliver world’s-best, absolute-premium apiary-derived raw materials.

Today, Bee Healthy leads the way for Australia in the export of royal jelly, bee propolis and bee pollen – while continually pushing the boundaries of our apiculture knowledge.

Australian Coastline

Our Mission

We are innovators and creators who understand the secrets of bees. We hold in our hands something we are proud of – the ability to grow, transform and create a superior range of bee products right here in the cleanest land on earth – Australia.

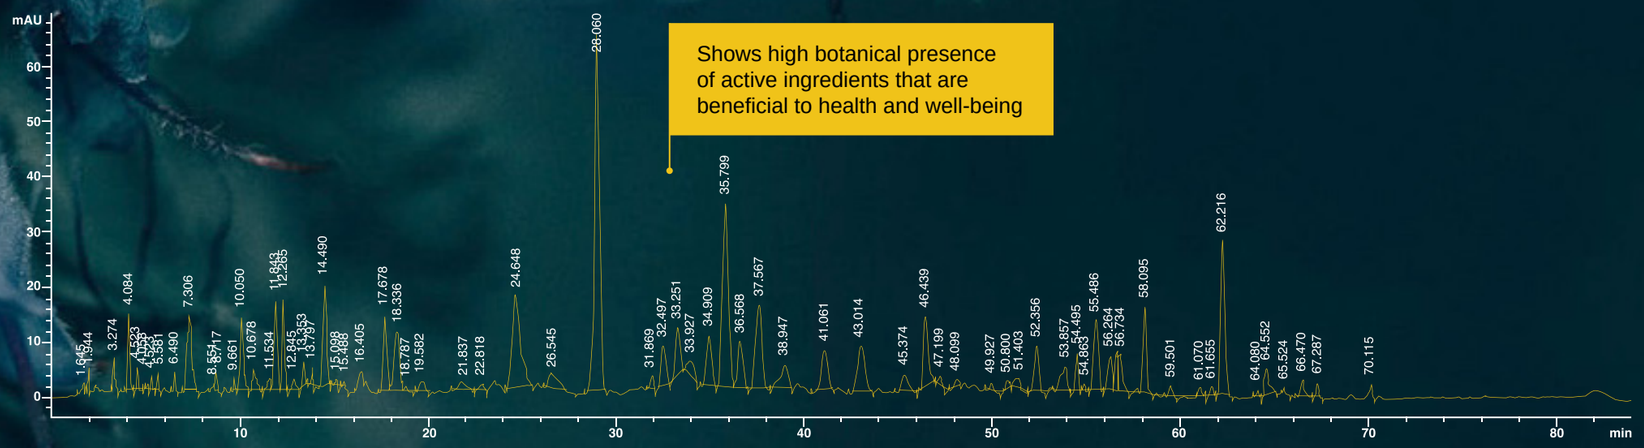

Our Difference

We are passionate about the standards we deliver; diligently working towards delivering a consistent stable product, validated at each and every stage throughout production.

SUPPORTED BY

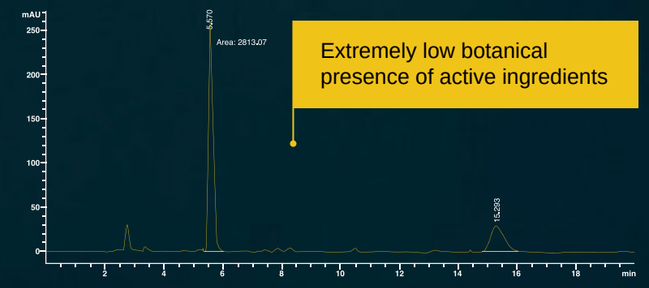

- HPLC Lab dedicated to the analysis of apiary products
- In-house research and development department dedicated to industry technological and resource improvements
- We have over 12 years of operational experience behind us
- We have access to over 2000 hives (and growing) within our South Australian and Australian cooperative network
- We can supply to order – bulk raw material, or retail-ready
- The ability to customise your order to your exact specification (particle size, adjust active ingredient, packing sizes and formats, formulation and new product development)

"We are the visionaries who believe, within these tiny boxes, the very essence of life exists.

- Michael Philippou MD, Bee Healthy Australia Founder

Research and Development (R&D)

We are constantly and consistently working on improving standards and methods of testing.

WE SPEND COUNTLESS HOURS

- Improving and developing better methods of extraction that preserve active ingredients
- Developing new forms of use for apiary products
- Searching for methods for better production of apiary products

The Lab

Australia’s first High-Performance Liquid Chromatography (HPLC) lab has been specifically built to ascertain the purity and active ingredients found in apiary-derived raw materials.

ALLOWS FOR

- Quality control at every stage of production guaranteed to meet your specification
- Delivery of the highest standards possible to customers

Our Products

- Improves brain health
- Promotes healthy aging
- Anti-inflammatory
- Anti-bacterial

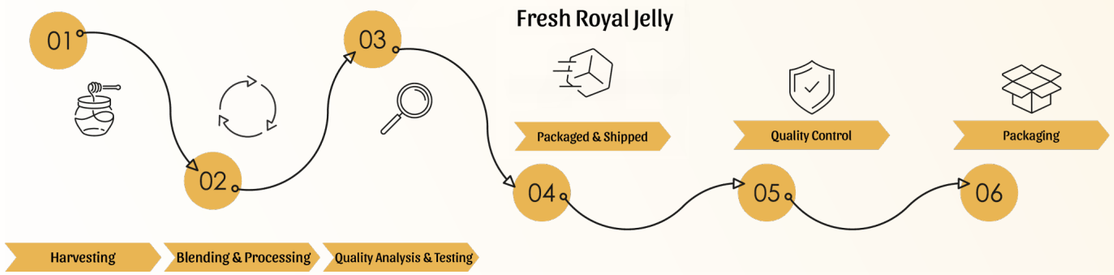

Fresh Royal Jelly

Royal Jelly is the food of queens. Produced in very small quantities in each hive, worker bees feed this super-food to the young for a short time, then to the queen for the rest of her life.

The nutrients contained in the jelly give the queen a lifespan of up to 5-years, compared to a few months for worker bees.

Royal Jelly is rich in proteins, lipids, essential vitamins, minerals and enzymes. Bee Healthy Australia Royal Jelly is 100% pure and natural.

The Process

- Does not require refrigeration
- Improves shelf life
- Highly concentrated
- 3.5 times more active than fresh royal jelly

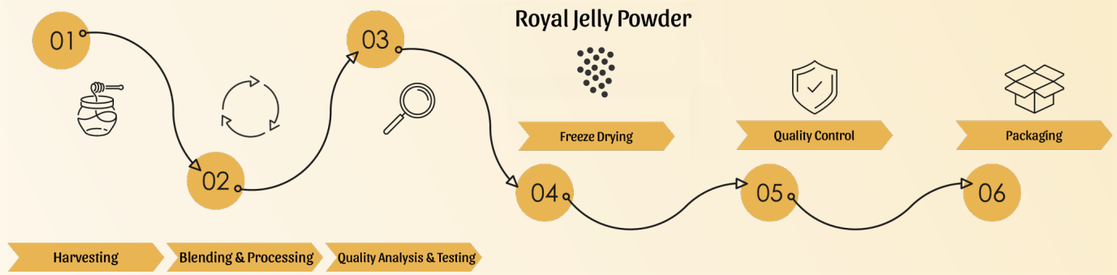

Freeze Dried Royal Jelly Powder

Our freeze-dried Royal Jelly powder is 3.5 times more concentrated than in its fresh form.

Bee Healthy Australia is extremely excited to be exporting this world-first product variant globally – proving to the world that Australia is a pioneer in apiculture.

Our Royal Jelly powder contains all of the health benefits of fresh jelly. It remains 100% pure and does not require refrigeration.

The Process

Our Products

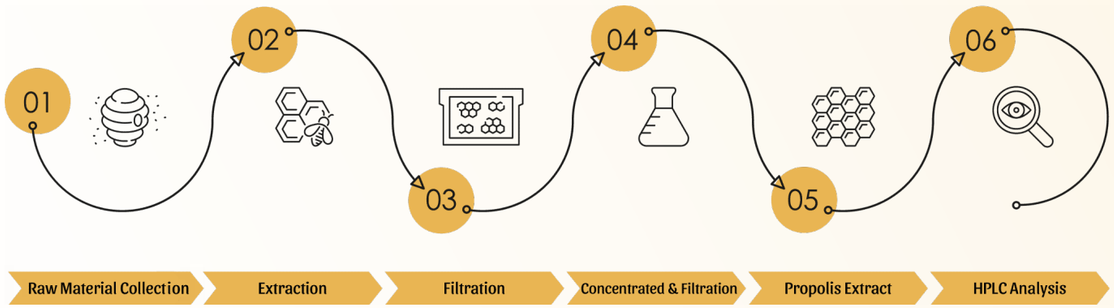

- Antibiotic
- High in bioactives
- Anti-inflammatory
- Anti-bacterial

Propolis

With our brand-new cutting-edge facility, we are proud to be Australia's first and only Propolis processor. What's more, we have a good supply emerging from the local cooperative all around Australia including from our clean, disease-free Kangaroo Island hives.

Bee Healthy Australia is able to supply:
Crude Propolis, Pure Propolis Resin and Propolis Powder.

The Process

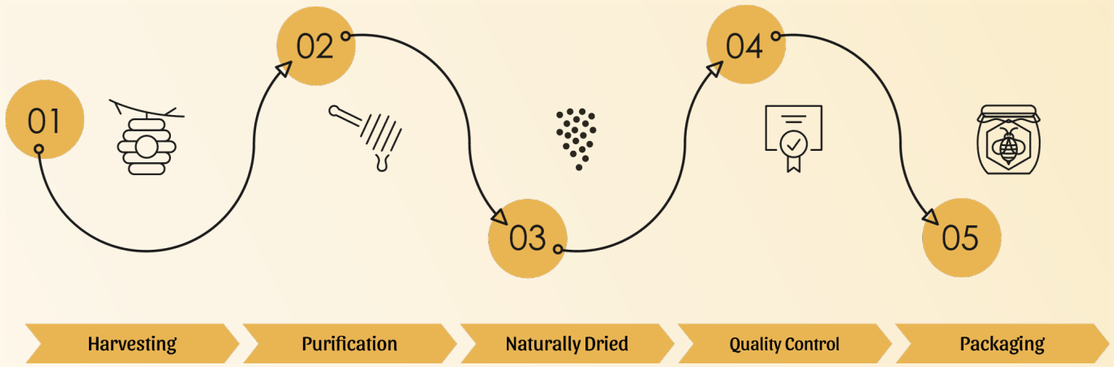

- Anti-oxidant
- Anti-cancer properties
- Anti-inflammatory
- Immunity booster

Bee Pollen

Bee Healthy Australia is the largest global distributor of Australian bee pollen. We are extremely selective and understand how to best capture a balanced nutrition profile by blending geographically sourced bee pollen.

Bee Healthy Australia bee pollen is not only crunchy and delicious, it is also one of nature's superfoods – linked to health benefits including reduced joint inflammation, improved immunity and accelerated wound recovery.

The Process

Our Process

Collection of Raw Material

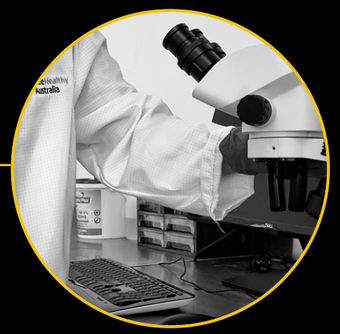

Processing, Qualifying and Testing

Inspection, filtration, initial testing, extraction, freeze drying and blending.

Lab Testing

Lab tested at every stage to ensure quality.
